Shania Bhopa

Shania Bhopa is a health communicator, knowledge translator, and a self-starter at her heart. She has a background in Health Communication from the University of Ottawa and a Master’s degree in Psychiatry from McGill University. Shania is a passionate advocate for health education and awareness, with a focus on child mental health, and global health. She is co-founder and Director of the Collaborating Centre for Knowledge Translation, Technology Assessment for Health Equity. Shania’s research interests include, lifestyle medicine, patient-physician communication, child mental health, and global health. She is also a recently published author of a children’s book: Gurk & Bianca: The great adventure of the gut and the brain.

Dr. Husein Moloo

Dr. Husein Moloo completed General Surgery Residency at Western University followed by a fellowship in Minimally Invasive Surgery and a Masters in Epidemiology at the University of Kanata. He then completed a fellowship in Colorectal Surgery at the University of Ottawa. He is currently an Associate Professor of Surgery and the Program Director of the General Surgery Residency Program at the University of Ottawa. He is also an Associate Member of the Institute of Molecular Medicine and the Institute of Health Systems at the University of Ottawa. Dr. Moloo has a long-standing interest in surgical outcomes research and currently leads multiple research projects funded by the Canadian Institutes of Health Research (CIHR) and the Canadian Cancer Society. His research interests include surgeon volume-outcome relationships, surgical errors, surgical education, and surgical innovation.

Dr. Manon Denis-LeBlanc

Dr. Manon Denis-LeBlanc graduated from the MD program at the University of Ottawa in 1993. She completed her clinical training in General Internal Medicine at University of Ottawa and then specialized in Gastroenterology at the University of Western Ontario. In 1999, she became Assistant Professor in Medicine at the University of Ottawa and in 2001, Associate Professor in Medicine and Program Director at the Montfort Hospital. Since 2007, Dr. Denis-LeBlanc has been full Professor in Medicine and Program Director at the Montfort Hospital. For some 1450 patients for 21 years, while maintaining a hospital practice at Montfort Hospital in Ottawa.

Dr. Redvers

Dr. Redvers is co-founder and current board chair of the Canadian charity the Arctic Council of Canada. He is a member of the various national and international initiatives that are involved at regional, national, and international levels promoting the inclusion of Indigenous knowledge and rights in the Arctic.

Dr. Nadya Ben Fadel

Dr. Nadya Ben Fadel is an Associate Professor in the School of Public Health and Epidemiology, University of Ottawa. She has a background in Epidemiology and has conducted research on infectious disease epidemiology, including SARS-CoV-2 (COVID-19); clinical trials to estimate efficacy of maternal and/or infant influenza, RSV, and - more recently - SARS-CoV-2 vaccines; and the epidemiology of respiratory viruses such as influenza, RSV, and - more recently - SARS-CoV-2. She also has research interests in the health of Indigenous populations and the impact of the COVID-19 pandemic on their health.

Professor Lord

Gillian Lord takes great pride in the Faculty’s numerous accomplishments during her time in this position, and throughout her diverse career with the Faculty. Ms. Lord has over 24 years of experience in academic affairs, research, and administration. She joined the University of Ottawa in 2003 as Manager of the Department of Anatomy and Neurobiology, and one year later she became the Director of the Graduate Studies Office. Ms. Lord then joined the Office of the Vice-President (Research) in 2011, where she was responsible for the funding and administration of University-wide research initiatives, including the President’s Research Chairs and the Canada Foundation for Innovation. In 2016, Ms. Lord was appointed to the position of Manager of the Research Office, where she continues to lead the development and implementation of the Ottawa-Shanghai Joint Research Program, leading to increased enrollment of sponsored and non-sponsored foreign trainees.

Dr. Alison Krentel

Dr. Alison Krentel is a Professor in the School of Public Health and Epidemiology, University of Ottawa. She has a background in Epidemiology and has conducted research on the epidemiology of respiratory viruses such as influenza, RSV, and - more recently - SARS-CoV-2. She also has research interests in the health of Indigenous populations and the impact of the COVID-19 pandemic on their health.

Dr. Christian Tremblay

Dr. Christian Tremblay is a Professor in the School of Public Health and Epidemiology, University of Ottawa. He has a background in Epidemiology and has conducted research on the epidemiology of respiratory viruses such as influenza, RSV, and - more recently - SARS-CoV-2. He has also research interests in the health of Indigenous populations and the impact of the COVID-19 pandemic on their health.

Dr. Bill Cameron

Dr. Bill Cameron is a Professor in the School of Public Health and Epidemiology, University of Ottawa. He has a background in Epidemiology and has conducted research on the epidemiology of respiratory viruses such as influenza, RSV, and - more recently - SARS-CoV-2. He has also research interests in the health of Indigenous populations and the impact of the COVID-19 pandemic on their health.

Dr. Saad B. Omer

Dr. Saad B. Omer is the Director of the Yale Institute for Global Health, and a Professor of Epidemiology and Health Policy at the Yale School of Public Health. He is an infectious disease epidemiologist whose research focuses on the epidemiology and control of emerging infectious diseases, with a particular emphasis on influenza and respiratory viruses. He has conducted numerous studies on the epidemiology of influenza and respiratory viruses, including studies on the effectiveness of influenza vaccines and the impact of influenza on respiratory mortality. He has also conducted research on the epidemiology of respiratory viruses such as influenza, RSV, and - more recently - SARS-CoV-2. His research has been published in numerous peer-reviewed journals, including Nature, Lancet, JAMA, and the BMJ. He has also been involved in the development of international guidelines for the prevention and control of influenza and respiratory viruses.

Dr. Daniel Figeys

Dr. Daniel Figeys is a Professor of Molecular Medicine and the Director of the Institute of Molecular Medicine at Yale University. He is an expert in the field of microbiome research and has conducted numerous studies on the role of the gut microbiome in health and disease. He has also conducted research on the role of the gut microbiome in the development of obesity, diabetes, and inflammatory bowel disease. His research has been published in numerous peer-reviewed journals, including Nature, Science, and Cell. He has also been involved in the development of new therapies for the treatment of obesity, diabetes, and inflammatory bowel disease.
